#### **DETAILED ACTION**

# Inventorship

1. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

#### Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on January 10, 2005 has been acknowledged and placed in the file. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the examiner is considering the information disclosure statement.

# **Priority**

3. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Federal Republic of Germany on 09 July 2002. It is noted, however, that applicant has not filed a certified copy of the Foreign application (Appl. No. 102 30 834.9) as required by 35 U.S.C. 119(b).

# Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims 23-25 are rejected under 35 U.S.C. 101 because the claimed invention is not supported by either a tangible device such as a computer medium storage asserted utility or a well established utility.

As per claim 23, the claim contains a computer program with a set of instructions per se without any medium storage to be claimed.

Claims 23-25 also rejected under 35 U.S.C. 112, first paragraph. Specifically, since the claimed invention is not supported by either a tangible device such as a computer medium storage asserted utility or a well established utility for the reasons set forth above, one skilled in the art clearly would not know how to use the claimed invention.

#### Allowable Subject Matter

5. Claims 14-22 and 26-28 are allowed over the prior art of record.

#### Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. References A-D are cited as being state of the art.
